

ADAPTING TO CHANGE **BUILDING RESILIENT ENCLOSURES**

Friday, November 8, 2019

JW Marriott Parq Vancouver Hotel
39 Smithe St, Vancouver, BC

BCBEC invites you to stay connected, current and inspired!

In our pursuit to build higher, faster and more cost-effectively, we must adapt to changes in the building envelope industry: changes in building regulations, performance requirements, construction methods, climate conditions and more.

This year's conference provides a platform for industry-wide dialogue on these challenges as we strive to build resilient, durable and energy efficient structures for the future.

Join us for this engaging one-day symposium to explore:

- Building envelope design and prefabricated construction
- Façade access and structural attachments
- Heritage restoration
- Air barrier approaches and airtightness testing
- Designing for resiliency and durability

Visit our website to learn more about the conference program, registration and sponsorship.
