

BUILDING

RE-IMAGINED

FRIDAY, OCTOBER 8, 2021

ONLINE CONFERENCE

8:30 AM TO 12:30 PM

EARLY BIRD REGISTRATION ENDS:
SEPTEMBER 29, 2021**BCBEC invites you to stay connected,
informed and inspired!**

Building higher, faster, and more energy efficient structures requires the construction industry to transform and adapt the way buildings are constructed and repaired. As we continue to push the boundaries on what is possible, the impact of our buildings on the environment around us becomes more apparent. This year's virtual, half-day seminar facilitates industry-wide dialogue as we explore how building envelopes are being re-imagined to meet current needs and future climate demands.

Join us for this virtual half-day seminar to discover:

- ▶ High Performance Wall Assemblies
- ▶ Deep Energy Retrofits
- ▶ Clean BC Net Zero Ready Construction Trends
- ▶ Cold Climate Passive House Case Study

Visit our website to learn more about the conference program, registration and sponsorship opportunities.
