

Building Resilience for a Changing Climate

Friday, November 4, 2022

JW Marriott Parq Vancouver Hotel,
39 Smithe Street, Vancouver, BC

**BCBEC invites you to stay connected,
current and inspired!**

The building envelope is key to a building's overall performance. Energy efficiency, sustainability, mechanical design, constructability, and occupant comfort are all impacted by the design and performance of the building envelope.

This year's full-day seminar provides an opportunity for industry-wide dialogue on these topics. The session explores the challenges in designing, constructing, and repairing our buildings for greater resiliency and energy efficiency for the future.

Join us for this full-day seminar to discover:

- Embodied Carbon & Sustainability
- Overheating Analysis & Mitigation for Existing Building Deep Energy Retrofit
- Building Enclosure & Mechanical Optimization Through Energy Modelling
- Design of Resilient Glazing Renewals
- Constructability of High Performance Building Enclosure Details

Visit our website to learn more about the conference program, registration and sponsorship opportunities.
